Future of Women in Sciences?

To predict the future,
we should look at the
past !!!

Nobel Prize Women in Sciences

Book by Sharon Bertsch McGrayne:

Since 1901 there have been over 300 recipients of the NP in sciences. Only 10 of them are women. **How so many?????**

If you look at the conditions under which they worked, you will realize that this is a gigantic number.

There was always a fair man behind....

So humiliating, isn't it?

1st symptom of our syndrome: fear of being helped

When a man asked me: do you want a professor position at the University? I said no.

1st mistake: not making use of networks and tutoring (which will be unavoidably male)

Destroy the cliches!

Switzerland, Appenzeller: last place where women
could vote

But the reason is: men were asked

Which would have been the outcome if the same
question would have been asked in other
European countries?

I am afraid that the same.

Changes are implemented by enlightened men
who take decisions and impose them.

Destroy the cliches!

South American men are Machos!!! **NO!!!**

In Brazil, if a woman gets an important position,
she will never wonder: is it because I am a
woman?

Low salaries force women to work, and they play
a very important role in the family budget

The hidden enemies

Lexicon: germanic languages

D: herrlich X dämlich

NL: heerlijk

Any similarity is just a mere coincidence!

HERRGOTT!!!!

The problem of translating titles

Professeur X Professeure

Maître Assistant X Maîtresse Assistante

Maîtresse en Physique: teacher or mistress?
Contingent of cabaret dancers!!!

The big danger: chameleon syndrome

Let us hide and keep walking:
Short hair, discrete men-like clothes,

Fortunately the ties
have not been adopted

The boys habits:

The ones they beat
become their best
friends

But women are so
different...

How to cope with that???

Massive attacks

It is impossible to grow without disturbing!

Ritual in tribal societies

The sunshine

But are we really equal ?

Physically we are not, why should we necessarily be intellectually equal?

Superior or inferior, we are evidently different.
We can bring new aspects.

I repeat my title:

How f*****-male a woman should
be to succeed?????

A lot!!!!

What to do?????

The best way to predict your future

is to create it.

“ The best way to predict your future is to create it. ”

- Abraham Lincoln
