

NASA's Aerospace Technology Enterprise Goals for... General Aviation

Invigorate the general aviation industry, delivering 10,000 aircraft annually within 10 years, and 20,000 aircraft annually within 25 years.

Version 1.0

Benefits:

- Every suburban, rural and remote community or county shall be served within a 30 mile radius by a Small Air Transportation System (SATS)-compliant airport with SATS compliant aircraft
- Safe, affordable and convenient direct access to over 5000 U.S. destinations at 4 times the average speed of highway travel
